THE FOUNDER

Built by someone who lived the problem.

Roman has been building and running operations his entire career. He founded Pavo Brewery from concept through revenue — full P&L, no outside backing. He then managed a Domino's Pizza branch in Israel, where fielding dozens of delivery and order calls per hour was the core of the job. That's how he learned firsthand how many businesses live and die by the phone.

Most recently, Roman spent 7 years as Operations Manager at Rosenstein & Associates, a Southern California law firm. Every night at 5pm the calls kept coming — and the firm had nothing but voicemail. He watched them lose clients they never knew they had. When AI voice technology matured enough to solve that problem at scale, he moved fast: SoCal Receptionist went from idea to a live platform with a paying client in under 90 days.

 7 yrs Operations Manager — Rosenstein & Associates (law firm)

 Founded & operated a production brewery from zero to revenue

 Built a live SaaS platform with a paying client in under 90 days

THE PROBLEM

Small businesses lose customers every day to missed calls.

A traditional receptionist costs \$35,000–\$45,000/year. Most small businesses can't afford one — so they miss calls, lose leads, and leave money on the table.

**62% of calls to small businesses go unanswered**

Callers don't leave voicemails — they call the next result on Google.

**Human receptionists cost \$35K–\$45K/year**

Plus benefits, training, turnover, and coverage gaps. Unaffordable for most SMBs.

**Calls arrive at 8pm, weekends, holidays**

After-hours inquiries — where 40% of new patient/client calls happen — go straight to voicemail.

THE SOLUTION

An AI receptionist that sounds human — and works every hour of every day.

SoCal Receptionist gives any small business a dedicated AI voice agent: answers calls naturally, collects info, transfers to staff, sends voicemail alerts — all for a fraction of the cost of a human.

Voice AI

Powered by OpenAI Realtime API. Natural conversation, custom business context, instant response.

Smart Transfers

Routes callers to staff when needed. Books appointments. Captures leads. Sends email alerts.

60-Second Setup

V3's chat wizard collects everything needed — business hours, services, staff numbers — in a natural conversation.

WHY AI WINS

The math is undeniable.

Whether you need after-hours coverage or a full 24/7 replacement, SoCal Receptionist costs a fraction of the human alternative.

SCENARIO A — AFTER-HOURS (5PM → 9AM + ALL WEEKENDS & HOLIDAYS)

✗ TRADITIONAL ANSWERING SERVICE

\$300–\$600/month — just takes a message and reads a script. No AI, no booking, no follow-up. A human relay, nothing more.

✓ SOCAL RECEPTIONIST — AFTER HOURS

\$500/mo · \$4,800/yr. AI answers every call — evenings, overnight, weekends, holidays — with full conversation, lead capture, and instant alerts.

SCENARIO B — FULL 24/7 REPLACEMENT (COMING SOON)

✗ 3 HUMAN RECEPTIONISTS — 3 SHIFTS, 24/7

3 shifts × \$160/shift × 365 = **\$175,200** in wages + \$17,500 taxes + \$52,500 benefits = **~\$245,000/year**. And they still call out sick.

✓ SOCAL RECEPTIONIST — FULL SUITE

\$2,000/mo · \$19,200/yr. 24/7 AI coverage. No payroll, no benefits, no HR. Saves **~\$225,000/year. 12× cheaper.**

PRODUCT — V3 PLATFORM

Built for self-serve scale.

V3 transforms SoCal Receptionist from a service into a fully automated SaaS platform. Any business can sign up, configure, and go live in under 60 seconds.

**Conversational AI Onboarding**

Chat wizard collects all business config naturally — no forms, no friction, live in under 60 seconds.

V3 NEW

**Public API + Webhooks**

Open API for custom integrations — send call data, transcripts, and leads anywhere.

V3 NEW

**OpenAI Realtime Voice**

Sub-500ms latency, natural conversation, fully custom business persona per tenant.

**Auto Phone Provisioning + Dashboards**

Dedicated number + Stripe billing auto-provisioned on signup. Client + admin dashboards included.

ROADMAP — WHAT'S NEXT

The roadmap is clear.

Live today, funded tomorrow, restaurants next.

 LIVE TODAY — V2

 AI Voice Receptionist (24/7)

 Conversational onboarding wizard

 Google Calendar booking integration

 Client + admin dashboards

 Stripe billing + 7-day free trial

 Public API + webhooks

 V3 — COMING NEXT (WITH FUNDING)

 Legal software integration

 Dental/medical practice software (Dentrix, Eaglesoft)

 SMS — text the AI receptionist directly

 SIP trunk — plug into existing phone systems

 Outbound calling — reminders, follow-ups, recalls

 Real estate + contractor verticals

 V4 — THE RESTAURANT PLAY

 Centralized franchise phone line

 Route caller to correct location

 AI trained on menu, hours & specials

 DoorDash / Uber Eats delivery ETA

 Toast / OpenTable / Resy integration

 Replaces dedicated phone staff entirely

One number. Every location. Zero hold music.

Restaurants & franchise chains are the largest untapped vertical in AI voice — and the product barely needs to change.

📞 EVERY CALL, HANDLED

- Hours & holiday schedule
- Menu questions & allergens
- "Where is my delivery?"
- Reservations & waitlist
- Catering & large orders
- Route to correct location

🔌 DEEP INTEGRATIONS

- **Toast / Square** — live menu & order data
- **OpenTable / Resy** — real-time reservations
- **DoorDash / Uber Eats** — delivery ETA on demand
- **Franchisee CRM** — route by zip or location

💡 THE FRANCHISE ANGLE

One centralized number for every franchise location. National ad campaigns. "Call 1-800-BRAND and we'll take care of you." The AI handles it — routes to the right store, answers the question, escalates only when it needs to. **Marketing gold for franchisors. Instant relief for franchisees.**

📊 THE NUMBERS

1M+ restaurants in the US
785K franchise units nationwide
\$40K+/yr saved vs. a dedicated phone staffer
60M+ Americans 65+ who prefer calling over apps

🏆 FOUNDER EDGE

Roman managed a Domino's branch — peak-hour phone chaos, staff pulled off the line to answer "where's my pizza?" He's not guessing at this problem. He lived it. Same product, bigger market.

MARKET OPPORTUNITY

A massive market hiding in plain sight.

Every professional small business — law firms, dental offices, medical practices, real estate agents, contractors — needs a receptionist and can't afford one.

33M

Small businesses in the US

\$15B

Answering service industry annually

1M+

SMBs in Southern California alone

 TAM — US professional SMBs that field phone calls**\$4.2B** SAM — SMBs actively seeking AI/automation solutions**\$840M** SOM — SoCal + Western US, 3-year reachable market**\$42M**

BUSINESS MODEL

Predictable recurring revenue. Low churn. High LTV.

Three tiers, annual incentives, and margins that scale. Each client = \$4,800–\$24,000 ARR. AI handles the work — COGS stays flat.

AFTER HOURS

\$500/mo

\$4,800/yr annual · No setup fee

- ✓ AI answers after-hours calls
- ✓ Dedicated phone number
- ✓ Email alerts + voicemail
- ✓ Client dashboard
- ✓ Ideal for solo practitioners

Most Popular

FULL SUITE

\$2,000/mo

\$19,200/yr annual · 12× cheaper than 3 humans

- ✓ 24/7 AI coverage — all shifts
- ✓ Custom AI personality + script
- ✓ Scheduling + CRM integrations
- ✓ Outbound calls + SMS (roadmap)
- ✓ Priority support + onboarding

UNIT ECONOMICS

~\$40

Est. COGS per client/month (AI + infra)

- ✓ 92% gross margin (After Hours)
- ✓ 98% gross margin (Full Suite)
- ✓ LTV at 24mo avg = \$48,000+
- ✓ CAC target: <\$500
- ✓ Payback period: <1 month

Live, generating revenue, and growing.

Built, shipped, and validated in under 90 days — from concept to paying customers to V3 SaaS platform.

V3

Self-serve SaaS platform live

Voice confirmed working

"That. Was. Perfect." — First client, CTF Designs, after hearing their AI receptionist answer a live call for the first time.

Full SaaS infrastructure built

Stripe billing, Supabase auth, Twilio auto-provisioning, dashboards, API, webhooks — all production-ready.

Outbound pipeline live

Cold email campaign targeting dental, legal, and medical offices across SoCal — 998 leads in Instantly.ai.

Rapid iteration velocity

Full V3 platform built and shipped in weeks. Chat onboarding, public API, dashboards — shipped and live.

WHY NOW

The AI voice moment has arrived.

Two forces converged to make this possible at scale in 2025–2026: real-time AI voice that sounds human, and small businesses desperate for cost cutting.

OpenAI Realtime API

Sub-second AI voice is now a commodity. What cost \$500K to build 2 years ago costs <\$50/month today.

SMB AI adoption inflection

Small businesses that dismissed AI in 2023 are actively budgeting for it in 2026. The window to establish brand is now.

No dominant local player

National players ignore the SMB segment. Local businesses want local service. We're the only SoCal-native product.

THE ASK

Pre-seed raise: \$300K

Raising \$300K pre-seed to hire our first sales rep, run paid acquisition, and expand into adjacent verticals (dental, legal, medical) with industry-specific AI personas.

40%**Sales & GTM**

First sales hire, outbound tools, local events

30%**Paid Acquisition**

Google Ads targeting high-intent SMB searches

20%**Product**

Industry-specific AI personas, integrations, mobile app

10%**Operations**

Legal, accounting, compliance infrastructure

12-month targets with funding

50 clients → \$25K MRR → \$300K ARR · Break-even at ~30 clients

Let's talk.

SoCal Receptionist is solving a real problem for real businesses — right now, in your backyard.
